Hand built cycles.

RIDE THROUGH '86 WITH DAWES

Handbuilt quality, technical superiority, craftsmanship and value for money set Dawes cycles apart from the rest.

1986 is the 60th anniversary of the Dawes legend, and we take a pride in the experience and skills of our production team, from frame design and component specification right through manufacture and finishing to assembly, testing and quality control.

At Dawes we believe that the frame is the heart of the bicycle, which is why we build all our frames and forks here in Tyseley, not in Taiwan.

Hence we can not only control the quality of the materials we use but also guarantee the meticulous care and attention necessary to ensure maximum frame strength and performance.

All frame tubes and lugs are carefully inspected and prepared, then assembled using a precision jig, and hand brazed using low temperature phosphor bronze to ensure the minimum of heat distortion.

After brazing every frame is shotblasted, fettled, pickled and phosphated before passing into the paintshop to be handsprayed and stove enamelled, for a lasting durable finish.

Finally lugs and other details are coachlined with gold leaf paint using an artists sable brush.

When so much care and attention has been expended building the frame, only the best componentry will do.

Suppliers from Britain and around the world are chosen to give a quality match. Assembly is carried out on an individual craftsman's bench to ensure that all components fit and work together perfectly. Only after a final thorough inspection does the bike become part of the Dawes handbuilt legend.

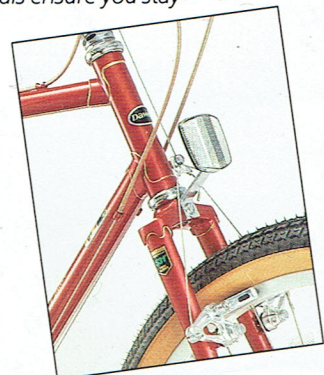

The Dawes 1986 range has been carefully selected to provide specifically designed cycles to suit the needs of the specialist and non-specialist alike. Full details of individual models are contained in the following pages.

COUNTRYMAN

THE COUNTRYMAN

The best of both worlds, The Countryman is the ideal combination of mountain bike and the classic touring machine. Designed for town-and-country use the 10 speed alloy transmission and lightweight Reynolds '531' frame makes road riding effortless. Take a turn off the beaten track onto the paths and bridleways and you'll quickly experience the other side of its character. The fat tyres hold their grip whatever the surface, sprung saddle and wide platform pedals ensure you stay comfortably on top of every situation.

MODEL	FRAME SIZES	FRAME ANGLES	FRAME MATERIALS	FRAME FEATURES	GEARS	FREE WHEEL	CHAINSET	GEAR RANGE	PEDALS	HUBS
Ranger	20", 22"	70° x 70° with 57mm offset forks	Reynolds 531 All-Terrain set throughout	Braze-on cantilever bosses and cable guides, reinforced brake hanger	Suntour Mountech, 15-speed, thumb shift levers	14/17/20/24/28 Helicomatic fitting	SR forged alloy, triple, 1 piece, 26/36/46T	25-88"	Alloy ATB platform, Cr-Mo spindles	Maillard Diabolo, heavy duty, sealed mech.
Countryman	20", 22"	70° x 70° with 57mm offset forks	Reynolds 531 All-Terrain set throughout	Braze-on cantilever bosses and cable guides	Suntour AR-GT, 10-speed, thumb shift levers	14/17/20/24/28, Helicomatic fitting	SR forged alloy 1 piece, 40/52T	38-100"	Alloy ATB platform, Cr-Mo spindles	Maillard Diabolo, heavy duty, sealed mech.

ALL TERRAIN

ON OR OFF ROAD, GO FOR RANGER & COUNTRYMAN

"All-Terrain Bikes", alias mountain bikes were born over a decade ago on the West Coast of America, bred from a cross between the heavy beach "cruiser" and agile "BMX" bike. Ideal for off-road, track and mountain use, these machines quickly developed with the kind of experience that can only be gained by careering down mountain or forest tracks under the toughest conditions.

Frame design and componentry quickly evolved and an entirely new breed of bike was born that could take the punishment, with lighter yet stronger frames, specialist components, more powerful brakes and low geared transmission for climbing those mountain peaks.

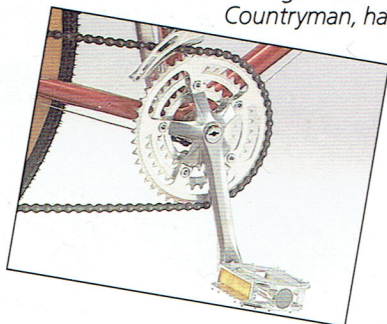

Dawes range of mountain bikes have evolved alongside the sport in the UK, and the 1986 Ranger and Countryman are both handbuilt to take the stresses and strains of the off-road adventure.

RANGER

THE RANGER

A full specification off-road mountain bike, ideal for the "rough stuff" enthusiast; 15 speed gears with handlebar mounted thumb shifters to make light of the steepest, roughest gradients; a long wheelbase frame built in Reynolds '531', light and flexible yet strong enough to take all the knocks; wide alloy bars; fat tyres and cantilever brakes to deliver all the control and stopping power you'll need. Finished in "Indiana Red" the Ranger has a host of features and Dawes bike building skills as its heritage. Ride into a different experience, the Ranger and Countryman, handbuilt to take it.

RIMS	SPOKES	TYRES/TUBES	STEM	HANDLEBARS	SADDLE	BRAKES	STANDARD EQUIPMENT	APPROX. WEIGHT	COLOUR

RACING

PERFORMANCE MACHINES FOR COMPETITOR & ENTHUSIAST

Achieve the racing edge! Whether you're a seasoned club competitor, up and coming rider or an aspiring enthusiast, Dawes have an exciting range of full-race and fast sports machines to satisfy your needs.

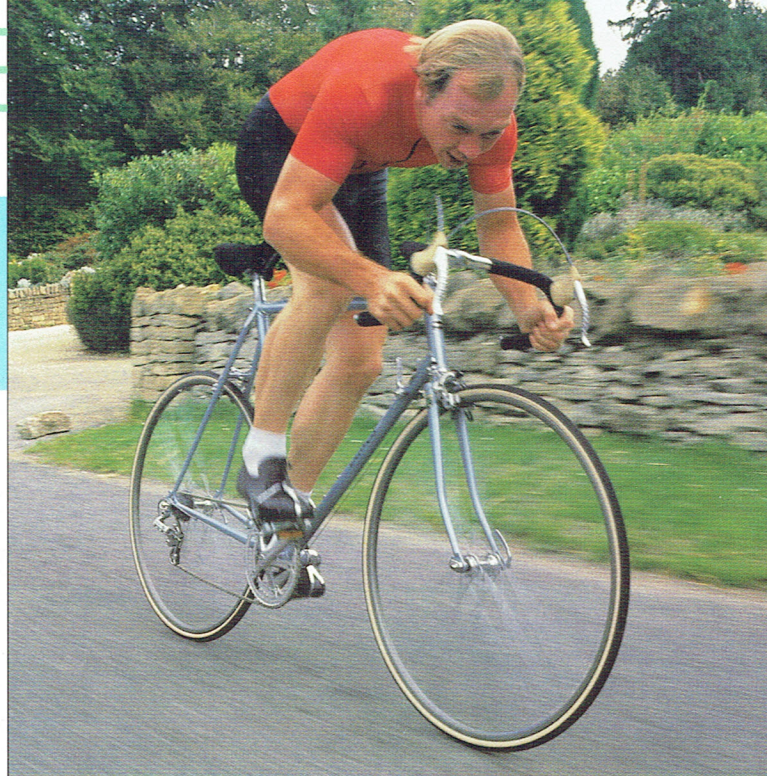

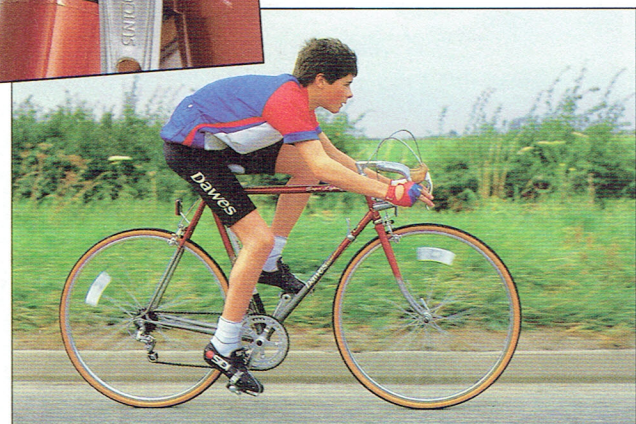

Machines carefully designed and handbuilt to demanding specifications to produce superb handling characteristics and positive power transmission through close ratio gearing for high speed smooth cadence.

All Dawes racing models have been engineered with a maximum of weight saving to achieve the best possible power to weight ratios for the rider.

DAWES FAST SPORTS

LIGHTNING

Understandably the most popular Dawes fast sports machine, with an impressive specification based on our proven formula. Lightning is finished in "Misty Blue Sunburst" and equipped with 10 speed gearing and new narrow section tyres.

LIGHTNING

SUPER LIGHTNING

SUPER LIGHTNING

This exhilarating fast sports machine has a host of race-bred features including Reynolds '500' series chrome molybdenum frame tubes for lightweight strength, alloy wheels and chainset, and up-rated 10 speed transmission. Finished in "Indiana Sunburst" with matching grey aero saddle and tape, Super Lightning is a road machine to be reckoned with.

RACING

DAWES FULL-RACE

Full-race machines for training, race and triathlon use. Compare the specifications for yourself. Reynolds '531' frame tubing, close frame angles, short wheelbase, mudguard clearance, brazed on gear changers, full light alloy componentry, range of machines designed to outperform, at prices that represent excellent value for money.

IMPERIAL

Designed to leave the pack behind! The Imperial features new full-blown race specification: Reynolds '531' competition tubing throughout, light alloy components, sealed mechanism hubs, butted spokes, anodised rims and a host of refinements normally only found on machines at a much higher price. Imperial is a machine to behold for the serious competitor and is finished in exciting new "Ice Blue".

RENOWN

Handbuilt to make your pulse quicken, the 1986 Renown features an improved weight saving specification including Reynolds '531' frame tubes and forks and full alloy specification. Finished in "Indiana Red" Renown is exceptional value for money for the aspiring club competitor and triathlete.

JAGUAR

A machine with a proven pedigree featuring Reynolds '531' frame tubes, light alloy components, 12 speed transmission and finished in two tone "Grey Sunburst". Jaguar is ideal for the training and fitness enthusiast.

T OURING

Get away on a Dawes and enjoy the sheer freedom and quality of life afforded by the Dawes 1986 range of touring cycles. Enjoy the lightweight features, the refined design, comfort, stability, practicality and ease of use for long distance cycle touring or urban use.

Tried and proven machines, handbuilt from Reynolds 500 or Reynolds 531 "butted" tubing and with top quality alloy components the Dawes 1986 Touring range continues the legend.

Handbuilt to last a lifetime there is a Dawes model to satisfy everyone from the beginner to the discerning enthusiast.

WARWICK

A stylish machine equally at home in town and country, fully equipped with a host of features including: Reynolds 500 frame tubes and 531 forks, frame fitted dynamo lighting, quick release front hub and alloy carrier. Finished in "Glacier Blue".

HORIZON

An exciting addition to the Dawes range for the cycle touring beginner. Horizon boasts many of the features of the more expensive touring machines at a genuinely affordable price. Finished in elegant "Burnt Cherry" Horizon features Reynolds 500 frame tubes and full lightweight alloy specification.

T OURING

FOR THE OPEN ROAD

GALAXY

SUPER GALAXY

TANDEM

GALAXY/LADY GALAXY

Simply the most famous name in serious cycle touring and here's why: lightweight Reynolds 531 butted frame tubing throughout with brazed on carrier mounts and gear shifters, alloy carrier with four point fixing to provide pannier strength and rigidity. The 12 speed wide range transmission enables the Galaxy to eat the miles without sapping strength or sacrificing comfort. Available in "Crystal Green" or "Midnight Blue" colour options.

New for 1986, ladies mixte 23" frame size. A handbuilt touring legend.

LADY GALAXY

SUPER GALAXY

The epitome of all that's best in touring quality for the particularly discerning cycle tourist. Finished in high metallic "Ice Blue" the Super Galaxy boasts all the features of the Galaxy plus cantilever brakes, Brookes leather saddle, 18 speed wide ratio transmission, and heavy duty touring wheels with sealed mechanism hubs and butted spokes.

TANDEM

A brand new tandem from Dawes, to meet the upsurge of interest in British designed and handbuilt touring machines. The "marathon" frame design is built entirely from Reynolds 531 giving maximum strength and lateral rigidity. An impressive component specification includes front and rear cantilever and rear hub brakes for increased stopping power, 18 speed wide ratio transmission, heavy duty hubs and butted spokes as well as a host of features that provide for comfort, ease of use and pannier carrying capacity. Study the competition and you will appreciate that Dawes gives you handbuilt quality at a price that's hard to match.

SPORTS & LEISURE

CYCLES WITH A STYLE TO MATCH YOUR OWN

For around town style and practicality, Dawes offer a full range of sports and leisure bicycles all designed and handbuilt for every day use with a flair for eye appeal. All Dawes sports and leisure models are fitted with derailleur gearing systems.

FINESSE

An ideal ladies sports and commuting model. The 'upright' riding position provided by the "Warwick" style handlebars and anatomically designed saddle provides comfort for every-day and prolonged use. Simple "thumb-shift" gear levers make changing the 5-speed derailleur gears a pleasure. Finished in elegant "Crystal Green", this sports cycle really puts on the style.

FINESSE

GAZELLE

GAZELLE/AMBASSADOR

Totally practical and efficient, these uprated models feature "Warwick" handlebars, full dynamo lighting, easy-to-use six speed Positron gears, prop stand and carrier. Both models feature Reynolds 531 forks for a more responsive and positive ride. Gazelle (Ladies version) is finished in "Indiana Red". Ambassador (Gents version) is finished in "Midnight Blue".

FAMILY

You can look forward to years of cycling pleasure from the Dawes family range.

All Dawes family cycles are designed to be uncomplicated and easy to ride yet having the essential features for sensible, safe cycling use including 3 speed hub gears. Quality machines built to last, unlike so many of this style of cycle on sale today.

KINGPIN RANGE

THE KINGPIN RANGE, THE ORIGINAL AND BEST!

Developed, and refined with handbuilt quality frame and components selected for lightweight reliability. Design features include: low centre of gravity, quick release seat adjustment for all the family, reflectors, strong alloy brakes with ball-end levers and white wall tyres making the Kingpin range the safe, stylish answer for family cycling. Kingpin sets the standard!

KINGPIN ORIGINAL – comes complete with detachable holdall and is finished in "Burnt Cherry" or "Glacier Blue" colour options.

KINGPIN FOLDER – goes where others can't, in the boot, on a boat, wherever space is at a premium. It folds and unfolds simply and quickly for total convenience.
